RESEARCH EXPERIENCE

Research Assistant *Hong Kong*

MMLab, The Chinese University of Hong Kong *Apr 2025 — Jun 2025*

- Advisor: Prof. Tianfan Xue
- Topic: 4D reconstruction
- Responsible for the creation of the training dataset for a diffusion-based refinement model by reconstructing dynamic scenes with 4D Gaussian Splatting (4DGS). The synthesized 4D sequences were pivotal for enhancing the model's ability to improve temporal coherence and spatial detail.
